

What's New with Imports?

The web pages have been changed!

We now have a Home Page titled 'Importation of Firearms & Weapons' and two new pages, one for importation by an individual (or business non-dealer) and one for importation by a NSW firearms dealer.

Home Page

This page contains general information of interest including a 'Frequently Asked Questions' link where you can find answers to the most common questions asked about obtaining a police confirmation and certification to import firearms or weapons. There are links to the following pages and also contact information for the Customs and Border Protection Service

Individual + Business Non Dealer

This page contains the General Application form and the ancillary forms for the specific item or items you wish to import.

In addition, there are two FACT Sheets which provide information on the importation of firearms and weapons. A link is provided to the Customs legislation relevant to imports.

NSW Licensed Firearms Dealers

This page contains the General Application form and the ancillary forms for the specific item or items for import by a NSW firearms dealer.

FACT Sheets and a link to the Customs legislation relevant to imports is provided, along with a Table which supplies summarised information on the items from Schedule 6 of the Customs (Prohibited Imports) Regulations 1956 which are relevant to a police confirmation and certification test.

The Schedule 6 Table can be used by firearms dealers to determine the Item number for the import. In the case of a firearms dealer, the item number for the specific firearm, ammunition, accessory or part must be transcribed onto the application form.
