Tables containing the requested information were reflective of the information in the Computerised Operational Policing System (COPS) current on 6 September 2016.

1. Number of firearm theft incidents

Financial Year	2014	2015
Incidents of stolen Firearms	245	239

Note: The incidents making up the numbers of incidents comprise of all stealing incidents in which at least one firearms was stolen. These incidents are made up of "Stealing", "Robbery" and "Break and Enter" incident types but do not contain incidents of seized firearms (e.g. domestic violence related firearms seizure) or firearms reported as lost.

2. Number of firearms stolen

Financial Year	2014	2015
Firearms	682	724

3. Number of firearms stolen per incident

Financial Year	2014	2015
Number of incidents with 1 Firearm stolen	107	90
Number of incidents with 2 - 9 Firearms stolen	133	142
Number of incidents with more than 10 Firearms stolen	5	7

The above table shows for each financial year, how many incidents occurred for each occasion on which a particular number of firearms was stolen.

Sensitive: Law Enforcement**4. Firearm Types/Categories**

The table below outlines information available in the system in relation to points 4, 5, 6, 7 and 8 in the request.

The information includes as far as recorded in COPS the description of the firearm type stolen (left hand column) and Category (right hand column).

The table breaks the numbers down for each firearms description type used in COPS as well as providing the number of incidents for each financial year for each firearm type.

Note: As different types of firearms may have been stolen in the same incident, the sum of the number of incidents in this table is higher than the total number of firearms stealing incidents for the financial year (as produced under point 1). This is because incidents where more than one type of firearm were stolen will be represented in the count for each firearm type.
